Natural Art

Go on a walk around your garden and collect some natural objects. Remember natural means NOT man made. How many different objects can you find?

Use the objects you have collected to make some natural art pictures. Here are a few of my attempts. I know yours will look much better than mine.

Here are some I found online that you can have a go at re-creating. I am looking forward to seeing all of your natural art pictures.

Around the house scavenger hunt!

Find something that is natural.

Find something that is see-through.

Can you write an acrostic poem about a Squirrel?

Play and Learn with water

Start by collecting some natural objects from around your garden or home.

Using a bowl of water (ask an adult to help you) test them out.

Observe weather the object Sinks or Floats.

Create a table for the objects.

Questions to ask yourself. Why does it do that?
 Is it more or less dense than the water?

Have ago at these challenges...

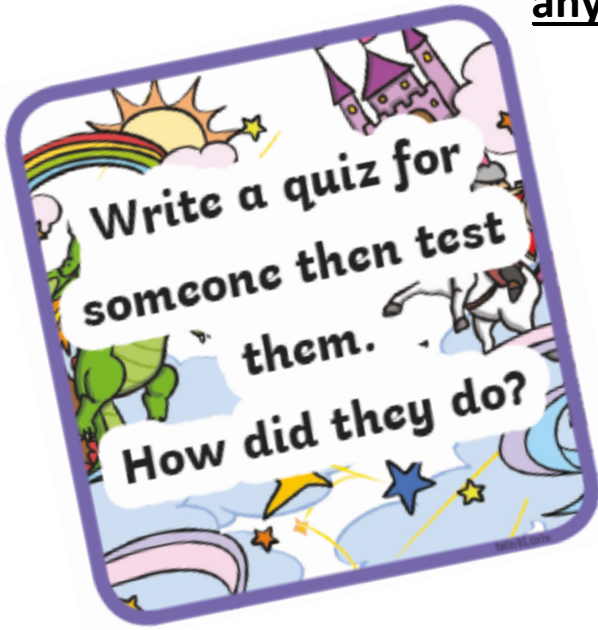

Can you make an Object that sunk float and vice versa?

HOW?
